INDEX TO VOLUME 5

Authors

ABRUZZI, ADAM. Rational systems and logics of action: The factory situation, 369.

ALLEN, LAYMAN E. Toward more clarity in business communications by modern logical methods, 121.

ARTLE, ROLAND AND BERGLUND, STURE. A note on manufacturers' choice of distribution channels, 460.

BELLMAN, RICHARD. ARROW KARLIN & SCARF'S *Studies in the Mathematical Theory of Inventory and Production:* Book Review, 139.

BERGLUND, STURE AND ARTLE, ROLAND. A note on manufacturers' choice of distribution channels, 460.

BERMAN, EDWARD B. A regional production and transportation model, 319.

BIEL, WILLIAM C., CHAPMAN, ROBERT L., KENNEDY, JOHN L., AND NEWELL, ALLEN. The systems research laboratory's air defense experiments, 250.

CHAPMAN, ROBERT L., BIEL, WILLIAM C., KENNEDY, JOHN L., AND NEWELL, ALLEN. The systems research laboratory's air defense experiments, 250.

CHARNES, A. AND COOPER, W. W. The theory of search: optimum distribution of research effort, 44.

COOPER, W. W. AND CHARNES, A. The theory of search: optimum distribution of research effort, 44.

COWAN, THOMAS A., F. G. LESIEUR, editor: *The Scanlon Plan, A Frontier in Labor-Management Cooperation:* Book Review, 491.

DANTZIG, GEORGE, JOHNSON, SELMER AND WHITE, WAYNE. A linear programming approach to the chemical equilibrium problem, 38.

DAVIDSON, H. JUSTIN AND MONTEVERDE, R. J. Lifo and statistical sampling, a case study, 279.

DERMAN, CYRUS. A simple allocation problem, 453.

DERMAN, CYRUS AND SOLOMON, H. Development and evaluation of surveillance sampling plans, 72.

DERMAN, CYRUS AND KLEIN, M. Discussion: A note on the optimal depletion of inventory, 210.

DICKINS, JUSTIN H. AND JENNINGS, NORMAN H. Computer simulation of peak hour operations in a bus terminal, 106.

DRUCKER, PETER F. Long-range planning, Challenge to management science, 238.

EASTMAN, WILLARD L. A note on the multi-commodity warehouse problem, 327.

FLOOD, MERRILL M. Some experimental games, 5.

FORD, L. R., JR. AND FULKERSON, D. R. A suggested computation for maximal multi-commodity network flows, 97.

FOX, JOHN AND MILLER, DAVID W., BEACH'S *Economic Models, an Exposition:* Book Review, 141.

FRIEDMAN, LAWRENCE. Competitive coefficients, 404

FULKERSON, D. R. AND FORD, L. R. A suggested computation for maximal multi-commodity network flows, 97.

FULKERSON, D. R. Increasing the capacity of network: The parametric budget problem, 472

GEISLER, MURRAY A. The simulation of a large-scale military activity, 359.

GESSFORD, JOHN. Scheduling the use of water power, 179.

GLASSER, GERALD J. Game theory and cumulative voting for corporate directors, 151.

GOLDMAN, ALAN S. Information flow and worker productivity, 270.

GRIFFITHS, DANIEL E., GROSS, MASON AND MCEACHERN'S *Explorations in Role Analysis: Studies of the School Superintendency Role:* Book Review, 489.

HARARY, FRANK. Graph theoretic methods in the management sciences, 387.

HERTZ, D. B. Discussion: A note on the political economy of organization, 136.

JACKSON, JAMES R. MORSE'S *Queues, Inventories and Maintenance:* Book Review, 495.

JENNINGS, NORMAN H. AND DICKINS, JUSTIN

H. Computer simulation of peak hour operations in a bus terminal, 106.

JOHNSON, S. M. Discussion: Sequencing n jobs on two machines with arbitrary time lags, 299.

JOHNSON, SELMER, DANTZIG, GEORGE AND WHITZ, WAYNE. A linear programming approach to the chemical equilibrium problem, 38

KANTOROVITCH, L. On the translocation of masses. Foreword by A. Charnes, 1.

KAO, RICHARD C. AND ROWAN, THOMAS C. A model for personnel recruiting and selection, 192.

KENNEDY, JOHN L., CHAPMAN, ROBERT L., BIEL, WILLIAM C. AND NEWELL, ALLEN. The systems research laboratory's air defense experiments, 250.

KLEIN, MORTON. OPERATIONS RESEARCH GROUP, *A Comprehensive Bibliography on Operations Research:* Book Review, 337.

KLEIN, M., AND DERMAN, CYRUS. Discussion: A note on the optimal depletion of inventory, 210.

KOENIGSBERG, ERNEST. Production lines and internal storage—A review, 410.

KWO, T. T. A theory of conveyors, 51.

LEVITAN, R. E. A note on Professor Manne's "Dominance" theorem, 332.

LIEBERMAN, GERALD J. Lifo vs. fifo in inventory depletion management, 102.

LITTAUER, S. B., WASSERMAN & SILANDER'S *Decision-Making, An Annotated Bibliography:* Book Review, 335.

LITTAUER, S. B., REINFELD AND VOGEL'S *Mathematical Programming:* Book Review, 494.

MILLER, DAVID W. AND FOX, JOHN, BEACH'S *Economic Models, An Exposition:* Book Review, 141.

MILLS, EDWIN S. Discussion: A note on the asymptotic behavior of an optimal procurement policy, 204.

MITTEN, L. G. Sequencing n jobs on two machines with arbitrary time lags, 293.

MONTEVERDE, R. J. AND DAVIDSON, H. JUSTIN. Lifo and statistical sampling, a case study, 279.

MORRIS, WILLIAM T. Some analysis of purchasing policy, 443.

NEWELL, ALLEN, CHAPMAN, ROBERT L., BIEL, WILLIAM C., AND KENNEDY, JOHN L. The systems research laboratory's air defense experiments, 250.

RADNER, ROY. The application of linear programming to team decision problems, 143.

ROWAN, THOMAS C. AND KAO, RICHARD C. A model for personnel recruiting and selection, 192.

SALVESON, MELVIN E. Planning business progress, 217.

SCHILD, A. On inventory, production and employment scheduling, 157.

SOLOMON, H. AND DERMAN, CYRUS. Development and evaluation of surveillance sampling plans, 72.

SOLOMON, MORRIS J. The use of an economic lot range in scheduling production, 434.

STARR, MARTIN K., STEPHAN AND McCARTHY'S *Sampling Opinions—an Analysis of Survey Procedures:* Book Review, 492.

THOMEN, JAMES R. ABRUZZI'S *Work, Workers and Work Measurement:* Book Review, 484.

TYNDALL, D. G. Welfare pricing and transport costs, 169.

VATTER, WILLIAM J. Contributions of accounting to measurement in management, 27.

WAGNER, HARVEY M. On a class of capacitated transportation problems, 304.

WAGNER, HARVEY M. AND WHITIN, THOMSON M. Dynamic version of the economic lot size model, 89.

WEINWURN, ERNEST H. Letter to Editor, 214.

WHITE, WAYNE, DANTZIG, GEORGE AND JOHNSON, SELMER. A linear programming approach to the chemical equilibrium problem, 38.

WHITIN, THOMSON M. AND WAGNER, HARVEY M. Dynamic version of the economic lot size model, 89.

WOLFOWITZ, J., FELLER'S *An Introduction to Probability Theory and its Applications:* Book Review, 336.

Articles

Application of linear programming to team decision problems, The. ROY RADNER, 143.

Book Reviews: ABRUZZI'S *Work, Workers and Work Measurement* by JAMES R. THOMEN, 484; ARROW, KARLIN AND

SCARF'S *Studies in the Mathematical Theory of Inventory and Production* by RICHARD BELLMAN, 139; BEACH'S *Economic Models, an Exposition* by JOHN FOX AND DAVID W. MILLER, 141; FELLER'S *An Introduction to Probability Theory and its Applications* by J. WOLFOWITZ, 336; GROSS, MASON AND McEACHERN'S *Explorations in Role Analysis: Studies of the School Superintendency Role* by DANIEL E. GRIFFITHS, 489; LESIEUR, FREDERICK G., editor. *The Scanlon Plan, A Frontier in Labor-Management Cooperation* by THOMAS A. COWAN, 491; MORSE'S *Queues, Inventories and Maintenance* by JAMES R. JACKSON, 495; OPERATIONS RESEARCH GROUP, *A Comprehensive Bibliography on Operations Research* by MORTON KLEIN, 337; REINFELD AND VOGEL'S *Mathematical Programming* by SEBASTIAN B. LITTAUER, 494; STEPHAN AND McCARTHY'S *Sampling Opinions—An Analysis of Survey Procedures* by MARTIN K. STARR, 492; WASSERMAN AND SILANDER'S *Decision-Making, An Annotated Bibliography* by S. B. LITTAUER, 335.

Books Received, 215, 339, 498.

Class of capacitated transportation problems, On a. HARVEY M. WAGNER, 304.

Competitive coefficients. LAWRENCE FRIEDMAN, 404.

Computer simulation of peak hour operations in a bus terminal. NORMAN H. JENNINGS AND JUSTIN H. DICKINS, 106.

Contributions of accounting to measurement in management. WILLIAM J. VATTER, 27.

Correction, 358.

Development and evaluation of surveillance sampling plans. C. DERMAN AND H. SOLOMON, 72.

Dynamic version of the economic lot size model. HARVEY M. WAGNER AND THOMSON M. WHITIN, 89.

Game theory and cumulative voting for corporate directors. GERALD J. GLASSER, 151.

Graph theoretic methods in the management sciences. FRANK HARARY, 387.

Increasing the capacity of a network: the parametric budget problem. D. R. FULKERSON, 472.

Information flow and worker productivity. ALAN S. GOLDMAN, 270.

Inventory, production and employment scheduling, On. A. SCHILD, 157.

Letters to the Editor: ERNEST H. WEINWURN, 214.

Lifo vs. Fifo in inventory depletion management. GERALD J. LIEBERMAN, 102.

Lifo and statistical sampling, a case study, H. JUSTIN DAVIDSON AND R. J. MONTEVERDE, 279.

Linear programming approach to the chemical equilibrium problem, A. GEORGE DANTZIG, SELMER JOHNSON, and WAYNE WHITE, 38.

Long-range planning, challenge to management science. PETER F. DRUCKER, 238.

Model for personnel recruiting and selection, A. RICHARD C. KAO AND THOMAS C. ROWAN, 192.

Note on the asymptotic behavior of an optimal procurement policy, A. Discussion: EDWIN S. MILLS, 204.

Note on manufacturers' choice of distribution channels, A. ROLAND ARTLE AND STURE BERGLUND, 460.

Note on the multi-commodity warehouse problem, A. WILLARD L. EASTMAN, 327.

Note on the optimal depletion of inventory, A. Discussion: C. DERMAN AND M. KLEIN, 210.

Note on the political economy of organization, A. Discussion: D. B. HERTZ, 136.

Note on Professor Manne's "Dominance" theorem, A. R. E. LEVITAN, 332.

Planning business progress. MELVIN E. SALVESON, 217.

Production lines and internal storage—A Review, ERNEST KOENIGSBERG, 410.

Rational systems and logics of action: The factory situation. ADAM ABRUZZI, 369.

Regional production and transportation model, A. EDWARD B. BERMAN, 319.

Scheduling the use of water power. JOHN GESSFORD, 179

Sequencing n jobs on two machines with arbitrary time lags. L. G. MITTEN, 293.

Sequencing n jobs on two machines with arbitrary time lags, Discussion: S. M. JOHNSON, 299.

Simulation of a large-scale military activity, The, MURRAY A. GEISLER, 359.

Simple allocation problem, A. CYRUS DERMAN, 453.

Some analysis of purchasing policy. WILLIAM T. MORRIS, 443.
Some experimental games. MERRILL M. FLOOD, 5.
Suggested computation for maximal multi-commodity network flows, A. L. R. FORD, JR. AND D. R. FULKERSON, 97.
Systems research laboratory's air defense experiments, The. ROBERT L. CHAPMAN, JOHN L. KENNEDY, ALLEN NEWELL AND WILLIAM C. BIEL, 250.
Theory of conveyors, A. T. T. KWO, 51.
Theory of search: optimum distribution of research effort, The. A. CHARNES AND W. W. COOPER, 44.
TIMS, fifth annual international meeting: A report, 340.
Toward more clarity in business communications by modern logical methods. LAYMAN E. ALLEN, 121.
Translocation of masses, On the. Foreword by A. Charnes. L. KANTOROVICH, 1.
Use of an economic lot range in scheduling production. The. MORRIS J. SOLOMON, 434.
Welfare pricing and transport costs. D. G. TYNDALL, 169.
